PokerTrainingNetwork.com Prepares to Offer Poker Training and Game Room Benefits

Compatible with Windows 7

Dallas, TX — November 16, 2009 — PokerTrainingNetwork.com (PTN), the brand new online poker training and network marketing company announced today that their software has earned the “Compatible with Windows 7” logo. PTN has created the Poker-TEL suite of software products, which works with Windows 7 to provide poker training and game room functionalities.

“Our award winning and accomplished staff has created compelling technologies combined with our custom reporting features and analytical poker coaching software that provides instant, as well as, historical feedback and guidance for all player levels,” said Dennis Nadeau, CEO of PokerTrainingNetwork.com. “By working directly with Microsoft, we feel confident in Poker-TEL and that it will provide users with enhanced functionality and significant value.”

After many weeks of testing, PTN’s Poker-Tel software became a “Front Runner” in Microsoft’s Development analysis. PTN hopes to continue its growth in the software and marketing industries with the help of this announcement of possessing compatibility with Windows 7.

Robert Bruck, Chief Technology Officer with PokerTrainingNetwork.com explained, “Emerging Microsoft technologies, such as Windows Presentation Foundation, Microsoft Silverlight and Windows 7, provide ease of use, rich and fluid animation and tight integration with the Internet that greatly enhance new multi-player gaming environments such as our Gameroom. We are proud to have worked with Microsoft to make sure our products earned the “Compatible with Windows 7” logo, and as a Windows 7 Front Runner.
